RCS64 Pitstops at WHO/digital

Black Button → **Enter pits** press and hold black lane changer button prior to pit entry. Car enters pit lane.

Pit entry registered when car passes pit tower, RCS64 knows car is in pit.

Red Button → **Stop in pits** cruise to a halt in pit box or press red brake button to come to a precise halt.

Black Button → **Bring up Pit Menu** press and hold black lane change Button to bring up pit menu.

Black Button → **Scroll Pit Menu** tap black button to Scroll through fuel fill and tyre options.

Red Button → **Re-fuel** tap red brake button on refuel icon to start refuel process. Green bar fills up.

Change Tyres tap red brake button on Hard, Soft, Inter or Wet icon. Green bar fills up. **← Red Button**

Leave pits when green tyre bar is at 100%, the car is ready to leave. Fuel does not need to be at 100% (splash & dash). Sometimes there is a delay on release - as in real racing. The exit sensor notifies RCS64.
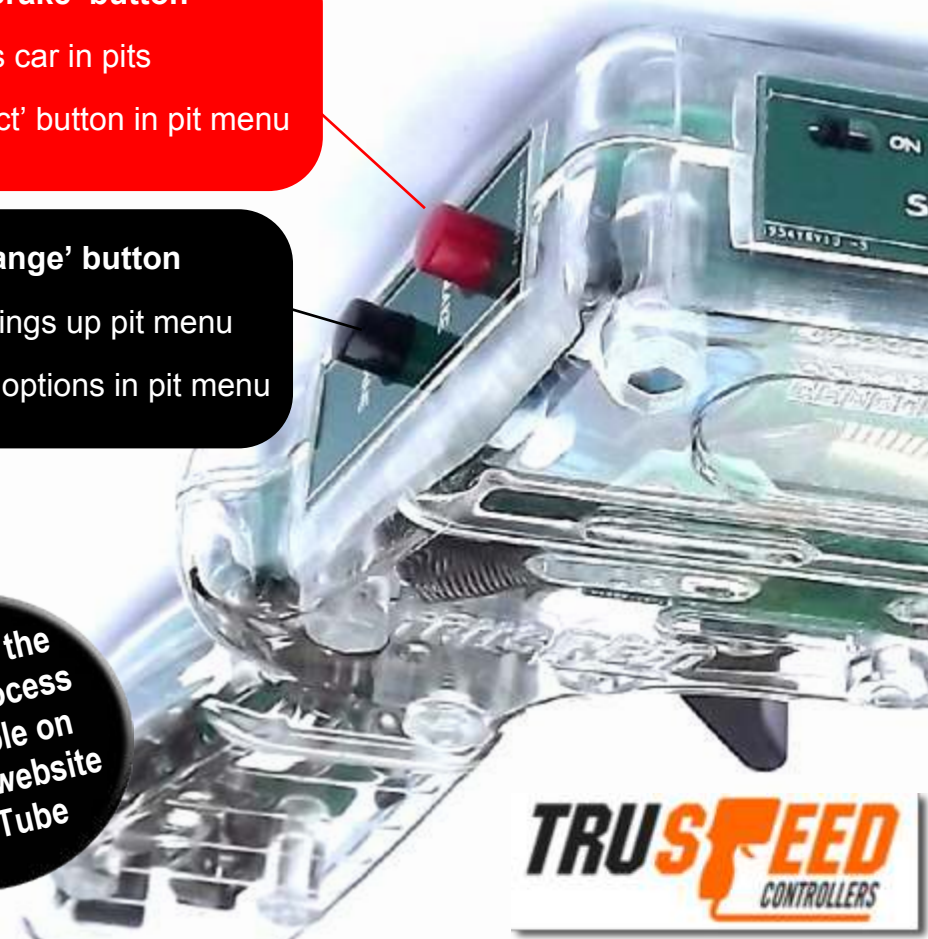

Red 'Brake' button
- Stops car in pits
- 'Select' button in pit menu

Black 'Lane Change' button
- Press & hold brings up pit menu
- Scrolls through options in pit menu

A video of the pitstop process is available on the WHO website & YouTube
